Â

From the long experience of Tierre, **FURBETTO** is finally born, the innovative column lift which represent the ideal solution to all the problems of space in your garage, your home or wherever your imagination suggests.

Built according to the strictest international standards, using the most sophisticated computer programs and computer design, **FURBETTO** is a point of reference for the high STANDARD security, both for ease of installation and use.

With its high capacity of 300kg and the large rotating loading floor, **FURBETTO** gives you the space where you easily can accommodate your bike, motorbike and everything you need but didn't know where to put.

Its size and characteristics have been designed to allow housing in every kind of garages, allowing you to accommodate a car whatsoever size.

FURBETTO is completely self-supporting, doesn't need to be fixed to walls or floor, simply place it on the ground and it's ready to work.
